AV-Comparatives
ESET's Encryption Outperforms Competitors in Latest AV-Comparatives Survey

SE Labs
ESET has received three AAA Awards and confirms its strongest features - zero false positives, low impact on system performance and 100% proactive protection.

“ I thought it was normal that security software installed on PCs caused slowdowns. But ESET is very much different. It does its job in the background without us even noticing.

EXPERT, MITSUBISHI MOTORS

Whether your business is just starting out or is established, there are a few things that you should expect from the security software you use daily. At ESET, we feel that running security software in the business environment should be easy and simple. That’s why we have created ESET Business Solutions, a perfect match for your 25+ seat business — utilizing 30 years of pioneering experience in the anti-malware industry.

3 Great Reasons to Choose ESET Business Solutions

1. Simple and Straightforward

With ESET Business Solutions you can mix and match endpoint protection according to your actual needs, deploying it on a range of platforms (Windows, Mac, Linux and Android) and devices: computers, smartphones, tablets, and servers.

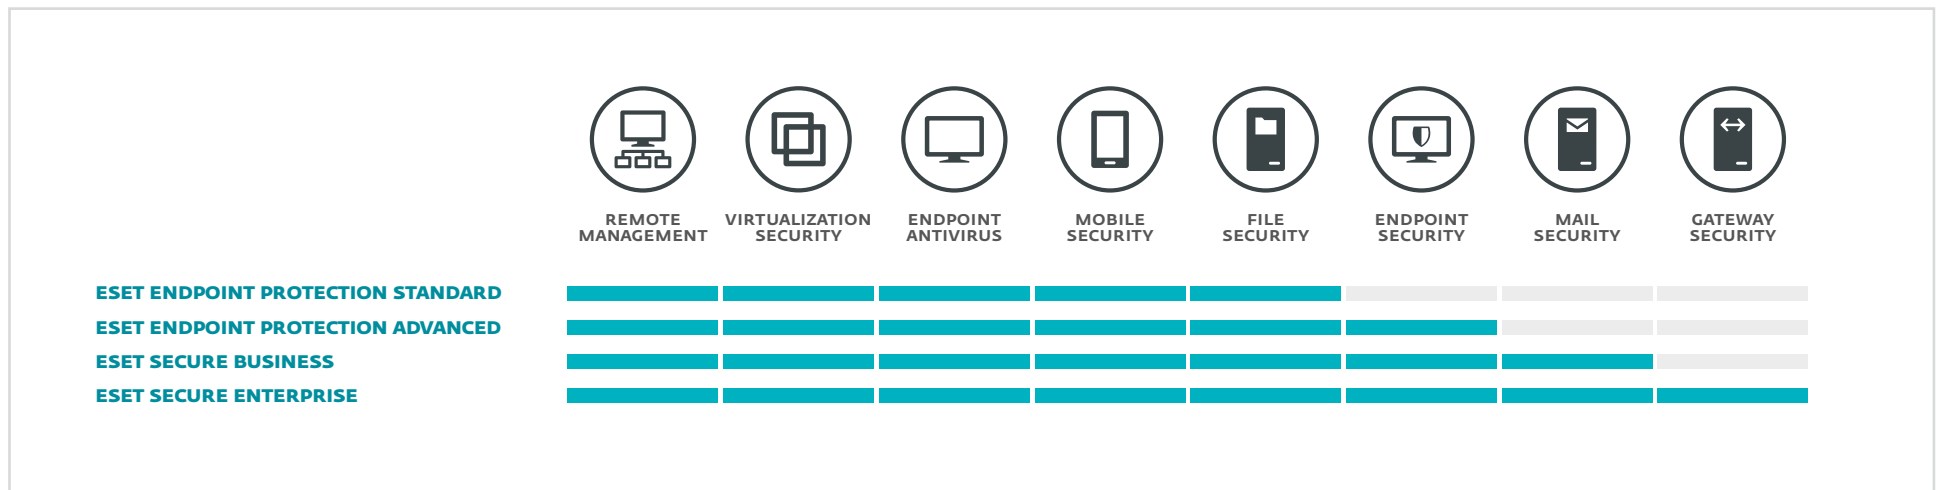

2. Light on Your System

Our solutions are built for small footprint, which also makes them suitable for older hardware, saving IT-related costs on hardware upgrades. In addition, program updates are small and can download from a central mirror server.

3. Easy to Manage

Easily deploy, configure and manage your security software from a single console. Just one person, using ESET Remote Administrator, our web-console, can oversee all your IT security. What’s more, ESET License Administrator, also accessible via web-console, means you can view and manage all your licenses cost-effectively in real-time, from one location.

Find the Right Solution for You

Endpoint Security

ESET Endpoint Security for Windows
ESET Endpoint Security for macOS

ESET Endpoint Security delivers all the benefits of ESET Endpoint Antivirus, plus Two-Way Firewall, Web Control, Botnet Protection, and more. With this solution you have the option of installing either ESET Endpoint Security or ESET Endpoint Antivirus on individual endpoints – whether they run Windows or macOS – as you choose.

Endpoint Antivirus

ESET Endpoint Antivirus for Windows
ESET Endpoint Antivirus for macOS
ESET NOD32 Antivirus Business Edition for Linux Desktop

Provides robust Antivirus and Antispyware protection, whether your endpoints run Windows or macOS. Our award-winning Anti-Phishing engine protects sensitive company information, such as usernames and passwords, against fake websites. The other advanced technologies inside include Cloud-Powered Scanning, Device Control, and more.

Mobile Security

ESET Endpoint Security for Android
ESET Mobile Device Management for Apple iOS

ESET NOD32® proactive detection technology, which is optimized for mobile platforms, delivers real-time protection to shield all your applications and files on Android devices, and includes Anti-Phishing and Application Control. For iOS devices, you can remotely push settings and restrictions to boost the security of your iOS mobile fleet. Anti-Theft lets you remotely lock/unlock or wipe all data, from both Android and iOS devices.

Virtualization Security

ESET Virtualization Security for VMware NSX
ESET Virtualization Security for VMware vShield
ESET Shared Local Cache

Whether you use VMware or another virtualization solution, you can rely on ESET protection to keep your VMs secure. With ESET Shared Local Cache and the protection of an agent-based ESET security product, you get significantly improved scanning speed.

File Security

ESET File Security for Microsoft Windows Server
ESET File Security for Microsoft Windows Server Core
ESET File Security for Linux / FreeBSD

Antivirus and Antispyware protection eliminates all types of threats, including viruses, rootkits, worms and spyware. Advanced Memory Scanner monitors the behavior of malicious processes, while optional Cloud-Powered Scanning ensures even better performance and detection.

Mail Security

ESET Mail Security for Microsoft Exchange Server
ESET Mail Security for IBM Lotus Domino
ESET Mail Security for Linux / FreeBSD
ESET NOD32 Antivirus Business Edition for Kerio Connect

Built using proven ESET NOD32 technology, ESET's solutions for your mission-critical email servers filter out spam and malware before they can reach your users' mailboxes. ESET Mail Security is well suited to complement the security of your network, providing an essential first line of defense.

Gateway Security

ESET Gateway Security for Linux / FreeBSD
ESET NOD32 Antivirus Business Edition for Kerio Control

Protects HTTP and FTP gateways against known and emerging viruses, worms, spam, and other internet threats. Featuring a small system footprint, ESET Gateway Security solutions are suitable for systems handling large amounts of data on a daily basis.

Remote Management

ESET Remote Administrator
ESET Remote Administrator VM for Microsoft Azure

Whether you are running Windows, Mac, or Linux endpoints, or even virtual machines and smartphones, you can manage company security from a single point. Install security software remotely and get at-a-glance network security overviews.
