

## Veritas™ Desktop and Laptop Option

Automated file backup and recovery for Windows and Mac

### OVERVIEW

Veritas™ Desktop and Laptop Option is a user centric backup solution that provides flexible implementation and centralized administration for backup and recovery of Windows and Mac desktops and laptops in the organization. This highly scalable solution with distributable components is suitable for environments of any scale, be it single-site, multi-site, or having remote offices, allowing you to protect even the most recent files with your users.

Built-in features include source side deduplication with content aware deduplication of Outlook PST and NSF files, automatic network selection for non-intrusive backup experience which enables switching between the offline, online and backup over internet modes, self-restore capabilities offered through agent, web browser and a mobile application, rollback capabilities for ransomware protection and also detailed auto reporting.

While incumbent antivirus software cannot be relied upon for detecting & preventing all ransomware, an endpoint backup strategy continues to be an effective fail-safe plan that ensures reliable backups to restore from.

	Critical Capability Expected	What DLO offers
PREPAREDNESS BEFORE ATTACK	Tailor fit the backup policy for ransomware scenarios	Customizable Backups
	Maintain RPO of seconds or minutes or hours	Multiple Backup Modes
	Control the file types that are being backed up	Include/Exclude Criteria
	Maintain multiple backup copies to restore from	Revision & Retention Policies
	Regularly monitor the backup status	Dashboard, Reports & Alerts
RECOVERABILITY POST ATTACK	RPO of seconds coupled with Day based revisions	Rollback Window
	Empowering end user with restore privileges	Self Restore Capabilities
	Allow restore of bulk users simultaneously	Parallel Restores
	Detailed reporting on the restore jobs	Restore Reporting
	Ability to restore to various locations	Multiple Restore Options
	Privileges for executive level data in the organization	VIP Privileges
	Point- in-time restore of the backed up data	Rollback Restore

### Product Highlights & Benefits:

**Automated Non-Intrusive Backups** - Desktops and laptops are protected automatically regardless of the connected network without any user intervention required.

**Continuous Data Protection** - Instantaneous backups with RPO of seconds including support for work-in-progress documents.

**Flexible Implementation** - Distributable components to suit the organizational needs and size with the ability to remotely install the agents on desktops and laptops.

**Ransomware Revival Strategy** - Highly customizable backup configurations ensuring a fail-safe plan against ransomware threats.

**Centralized Management** - Dashboard enabled administration console providing a graphical visualization of the endpoint backup environment.

**Built-in Security & Resiliency** - Integrated 256-bit Advanced Encryption Standards (AES) encryption with automatic Data Integrity checks and interruption tolerance.

**Storage & Network Efficient Backups** - Built-in global source-side data deduplication and bandwidth throttling capabilities for fine tuning backup performance.

**Automated Reporting** - Detailed reports on the endpoint backup environment with predictive backup status reporting for effective monitoring.

**Self-restore capabilities** - Empower end users to browse and restore the backed up files without any support assistance.

**Instantaneous access to backed up files** - Mobile application for iOS & Android platforms for on-the-fly access on smart devices.

## KEY FEATURES

- **VPN-less Backups over the Internet** - Automatic network selection ensuring seamless backups over an available internet connection when computers are not connected to the corporate network.
- **Delta Backups** - Backup incrementally only the changes that are performed on the files ensuring network and storage efficiency.
- **Administrator Dashboard** - Easy to interpret, real time interface that provides a graphical visualization of the endpoint backup environment from the operational, deployment and capacity planning perspectives.
- **Backup Status Report** - Predictive report enabling administrators to monitor the status of backups across the organization which can be configured for auto generation.
- **Rollback Restore** - Enhanced Restore capabilities with point-in-time restore or backed up files and detailed reporting on the restore activities.
- **Alerts and Notifications** - Empower the administrators and specified users with detailed alerts and notifications for regular updates on the endpoint backup environment.
- **Audit Trail** - Enabling organizations for compliance by providing accountability for the actions performed within the endpoint backup environment.
- **Endpoint Migration Utility** - Empower end users for hardware refresh scenarios with options to effectively migrate their files from one laptop to another.

## WHAT'S NEW WITH DESKTOP AND LAPTOP OPTION 9.6

- **Storage Extension** - DLO now has the capability to add extended network storage that ensures continuous data backup during an inadequate disk space scenario.
- **SQL compatibility check** - The DLO installation and upgrade are enhanced to perform the SQL version Compatibility check.
- **DLO support on Cloud platform**
  - a) DLO now supports all DLO Server components deployment on AWS and Azure, while the DLO Agents remain on-premises in the corporate network.
  - b) DLO now supports all DLO Server components and the DLO Agents are deployed on-premises in the local corporate network, with the DLO Storage configured on AWS cloud volume.
- **VQA (Veritas Quick Assist) with DLO** - Veritas Quick Assist utility is now integrated with DLO. Using this utility, DLO Administrator can collect the logs from all DLO Server and Client components at one central location, for ease of issue reporting and troubleshooting.
