An Introduction To StorMagic SvHCI™

PACISOFT
Optimizing Value - Sharing Success

ABOUT SvHCI

StorMagic SvHCI is a full-stack hyperconverged infrastructure solution. It combines virtualized storage with a StorMagic hypervisor, virtualized networking, and management components.

With SvHCI, your organization can virtualize your entire infrastructure without the significant financial commitment required by other solutions on the market.

BENEFITS OF SvHCI

Purpose-built and right-sized for on-site applications and data.

Radically simple, integrated full-stack HCI solution.

Rock solid, proven technology built on KVM and SvSAN.

Designed for 100% uptime with enterprise-class reliability.

Fully supported by StorMagic.
